DESIGN FOR PLANT COMPLETED AHEAD OF SCHEDULE

Emerging domestic natural gas and helium producer Renergen is pleased to announce the completion of the design of the Virginia Gas plant, 22 days ahead of schedule.

This significant achievement marks the completion of the fourth major milestone at the Virginia Gas Project, as the company works towards commencement of production in 2021.

"Despite the challenging work environment, all teams continue to work extremely hard to deliver on our stated goal of commencing production in 2021. I could not be prouder of the entire team and their determination in bringing the Virginia Gas Project to life," said Stefano Marani CEO, Renergen.
